**Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.**

### **“Higher” Respondent Answers:**

- first week of the month when 401k money flows in.
- On Weekly Chart Timeframe, I see an uptrend doji candlestick pattern at level of support
- Trade war is fake news at its obvious peak. The back and forth will continue to swing higher and lower with a mean of generally higher. Gold and oil doing their dance for now.
- break above resistance
- I feel like the strength of the market has overcome a myriad of systemic obstacles
- good economic statistics
- Employment figures
- S&P bounced, and closed near its week's high on Friday, helped by a positive jobs report. The momentum favors the bulls at this point.
- The good news that turned the market around last week will have a small but positive carry through this coming week
- constructive pause, higher lows
- Weekly averages (DOW and S&P) have been moving slowly in an up direction.
- The market will never go down
- DIA trending turns up...

### **“Lower” Respondent Answers:**

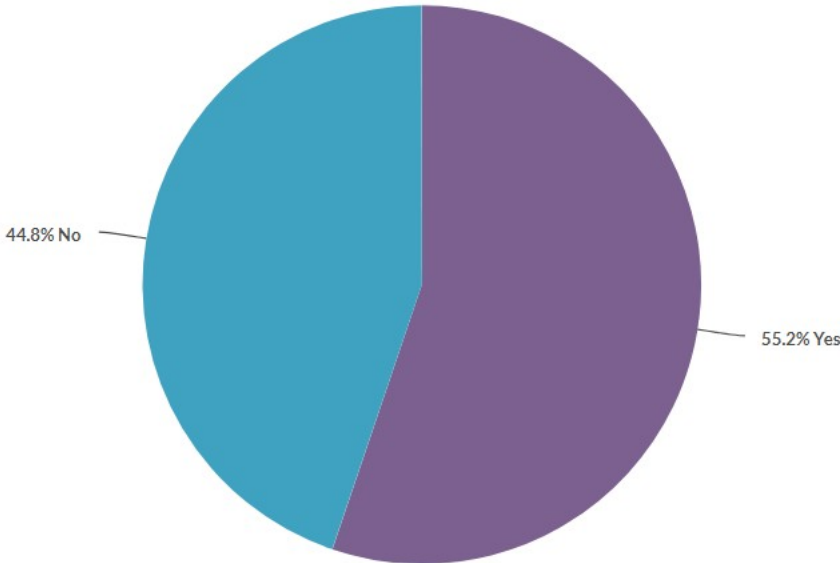

- S&P500 is at the top of its recent range (~2700 - ~2740). If it breaks to the upside, then further gains can be expected. However, with trade war rhetoric back in focus, I'm looking for the S&P500 to stay range bound this week.
- Summer sell off began 2 weeks ago
- Trade Wars. US economy overheating and will cause oversupply.
- Sell in May and go away.
- The downside correction will not be complete until there is a selling climax. Just get me out.
- Erraticness of Administrations policies is starting to sink in and it is NOT good for the markets
- poor momentum and breadth
- I believe the international trade conflict could have a bearish effect on the S&P
- Trump's tariffs
- trading war

### Question #4. Which indicator influences your trading the most?

- EMA
- No one indicator on its own influences my trading. However, if I had to pick & use only one; I'd probably go with Stochastics.
- Volume
- RSI
- Price action
- Fibonacci ratios
- News and earnings.
- Rsi7 and the nyse tick
- previous day's change along with volume, particularly institutional
- Elliott wave theory
- Elliott Wave
- Dow and other indicators up or down.
- volume
- Price action; also support/resistance areas.
- ADX
- Gold
- the oil stocks
- PRICE ACTION
- MACD
- Moving averages and volume.
- chaikin oscillator
- adx
- volume
- Slow stochastics
