Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

“Higher” Respondent Answers:

- Donald Trump ideas maybe help
- going with the trend
- In this final week of AUG, institutions will be re-balancing & window dressing their portfolios & SPX will grind higher to confirm the breakout & anticipate 1st week of Sept trading and 7 Sept NFP. With so many predicting a down Aug & an annual correction in Sept/Oct, the market is bound to go up instead. Seasonal predictions have turned out to be crap & if they happen, they are very temporary. I like all the talk about recession and fear. That is very bullish. USA will win the trade war!
- Weed stocks will continue to push it up
- Risky not to buy
- All the industry indexes are positives :-)
- Momentum and seasonality.
- dovish fed talk
- trending
- Last week, dips were being bought, especially on Friday. Looks like the up move will continue.
- The market (SPX) has broken out of the ATH resistance. Now the path of least resistance is higher into 2900 area.
- This week
- Its toppy folks!

“Lower” Respondent Answers:

- Not good at working out where market goes
- Trade debate, political uncertainty, vacations
- I think that the global situation with chinese tariffs and Iran and Turkey are all coming to a head.
- A topping formation is almost forming a slide down is due any day, likely Tue or even Monday.
- SEP..
- Back to school positive action. Retail traders can only help the continued momentum.

Previous gold bottom ended up being a basement to a sub basement. The yellow metal may once again start its wall of worry rise even though Powell and crew say inflation is tame.

Question #4. Which trading platform or broker do you like the best for executing your trades?

- fidelity
- Stocks to trade platform Etrade for a broker
- TOS but it's not the bat you use, it's the person using the bat. It's not the cost of the commissions, it's the positions and money management for your trades that should be the focus. JPM may start commission free trades but how many errors are you going to make learning a new platform?
- TD
- Yours
- Profit able one if possible
- Interactive Brokers
- TOS
- Trade Station
- TD
- TD
- E*Trade
- There are lot of good trading platforms such as StreetSmart Edge (Schwab), Trade Station, Think or Swim, etc. It is up to a trader to chose his trading platform.
- tastyworks
- IG Index ans Saxo bank
- Ninjatrader Firetip of Ironbeam
- none they all have weaknesses that marginalize strengths
- Tastyworks.

Question #5. Additional Comments/Questions/Suggestions?

Thank you for all the feedback, feel free to [contact us](#) at any time with any other questions or comments.

- A candidate can legally contribute unlimited amounts of his own money for his own election campaign even to obtain NDA's. Trumps payments to the kiss and tellers are totally legal. If the DEM's take the House, impeachment will not be brought and if brought will fail in the House and if passed will fail in the Senate. The DEM's are afraid that Trump is too successful. Tariffs are tough to endure but his actions are the right ones. Shame on all his predecessors who were too cowardly to do it.
- Oil surprisingly keeping a lid even though ability to withstand supply disruption is tight.
- I like your great survey and I request you to expand to more real traders to get their views.
