

[Monday, 1PM ET: Top Trading Experts Discuss This Report! Click Here To Learn More.](#)

Question #1. Which direction do you think the S&P500 index will move from this coming Monday's open to Friday's close (December 3rd to 7th)?

(The order of possible responses to this question on the survey were randomized for each viewer.)

Higher: 73.7%

Lower: 26.3%

Higher/Lower Difference: 47.4%

Question #2. Rate your confidence in your answer to Question #2 by estimating the probability you have correctly predicted next week's market move.

Average of All Responses: 67.2%

Average For "Higher" Responses: 68.8%

Average For "Lower" Responses: 63.0%

Higher/Lower Difference: 5.8%

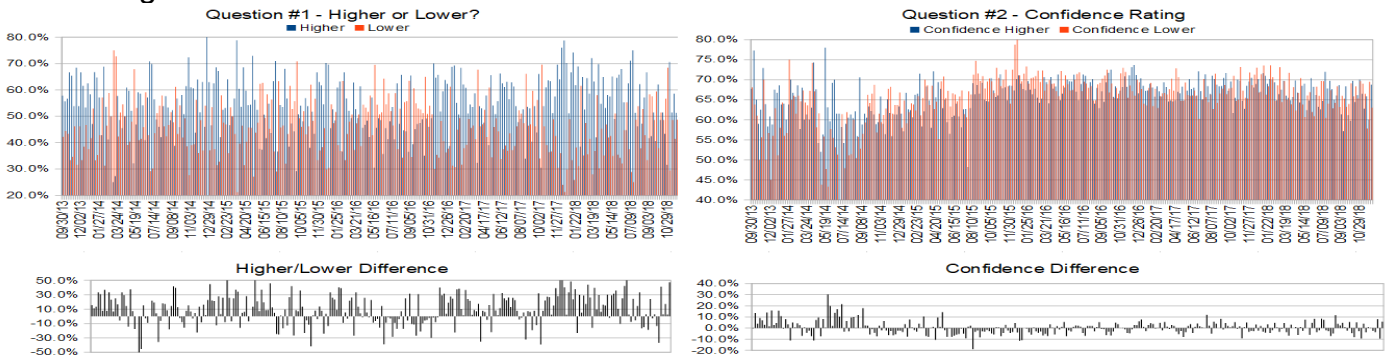

Responses Submitted This Week: 40

52-Week Average Number of Responses: 44.8

TimingResearch Crowd Forecast Prediction: 58% Chance Higher

This prediction is an attempt by the editor of this newsletter to use the full 5 year history of data collected from this project to forecast a probability estimate for whether this week's sentiment is going to be correct and ultimately what the markets will do this coming week.

Details: Last week's majority sentiment from the survey was 51.3% Higher, and the Crowd Forecast Indicator prediction was 69% Chance Higher; the S&P500 closed 4.16% Higher for the week. This week's majority sentiment from the survey is 73.7% Higher with a greater average confidence from those who responded Higher. Similar conditions have occurred 55 times in the previous 270 weeks, with the majority sentiment being correct 58% of the time and with an average S&P500 move of 0.13% Higher for the week. Based on that history, the TimingResearch Crowd Forecast Indicator is forecasting a 58% Chance that the S&P500 is going to move Higher this coming week.

NOTE: The following open-ended answers are solely the opinions of the anonymous respondents to this survey. Responses are mostly unedited, but some have been reformatted slightly for to make them easier to read. Some irrelevant responses (e.g. "none"), or anything obviously fake, or copy and pasted responses have been omitted. All-caps responses have been changed to all lowercase. All responses for each week, unedited, are available in the raw data spreadsheets at TimingResearch.com/data.

Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

“Higher” Respondent Answers:

- Deal with China
- Resultado of US and Chinese talos about tarde tarrifs.
- Trump's info from Southamerica
- Continued Rally from oversold.
- g20 talks positive bias... Fed dovish
- I think there is some optimism about about a trade deal between America and China. Even a hint of a deal would cheer investors.
- es went above 2763.56-on friday close --bullish for me. however ,crude to 48 then 43-.watching CRUDE--and dollar -as catalyst to down-recession???.dollar above 97.63-- could kill my bull thesis-crude to 48/43.00 kill bull.....
- AD line going up, NYSI positive
- trade news
- Holiday season optimism
- history
- Short-covering rally to occur following Pres Trump's relaxation of Jan 1 tariffs.
- This past week had a nice reversal up from the previous down week. The tariff stuff is probably already built into the market. Looking for continuation up.
- China deal
- Bogus rally playing out market loses twenty percent in 2019
- Trump will make it seem as though the trade tariffs are being eased, and the fed has softened their stance. Also money managers need to make a good showing by year end and will be pushing the mono sticks higher.
- Satna Rally
- Continued rally to Xmas
- Stochastics rise a couple more days then ?

“Lower” Respondent Answers:

- I answered lower. Yes, there could be a Santa Clause rally at this time? What I see is QQQ, IWM and SPY are all below the cloud on an ichimoku daily chart. All three are below or just touching the long-term M/A. All of my trend following indicators are pointing down. So there you have it, could continue higher for a while but I am expecting lower.
- Overbought market
- Trump/Xi negative outcome
- decreasing profit trend
- overbought short term
- It]s not so much that I believe markets will be lower next week as it is that I believe that once investors begin to realize the economy in general is really beginning to weaken and reverse course that market indexes begin seriously dropping. It begin next week or not but it is going to happen and sooner rather than much later. So I'm not predicting what will happen next week, necessarily. As the economy slows significantly, then the current spats of "irrational exuberence" will cease to occur as reality sets in.
- christmas / China
- Higher volatility happens in bear markets. Sudden large upmoves is what keeps hopeful bulls in the market even as it overall goes lower (ie in spite of the occasional large upmoves).

Question #4. What procedures do you use to monitor and evaluate your trading results and progress over time?

- rate of change
- 3ema----8ema-----20ema----167ma-multiple time frames--20yr monthly --5yr monthly-macro-----then 3month daily----1yr daily micro--
- Watch financial news daily
- Journal and assessing other ways I could have done the trade better
- growing/shrinking bottom line
- I keep a simple spreadsheet of results, with a lot of room for notes what we could have done in a better way, mistakes and general observation how a particular stock or ETF behaves.
- Account balance
- A lot of journalling does not work for me. However sometimes there's an important lesson learned and I'll keep those highlighted on same page as my current trades so I'm forced to read it as a reminder. By "same page", that's my own list of trades entered on my own Excel spreadsheet.
- Input results of each trade into spreadsheet & study results of each trade in a post mortem review. Mark up charts of each trade & save file for future reference..
- Schwab
- financial software

Question #5. Additional Comments/Questions/Suggestions?

Thank you for all the feedback, feel free to [contact us](#) at any time with any other questions or comments.

- When will this market turn down for the long term

Standing Predictions

Below are some of the one-time prediction-type questions asked in previous weeks that have not been finalized yet or have been finalized recently. Suggest a future question [here](#).

Week #264, 10/14/18 Report - Do you think the drop in the markets this week were the start of a longer downtrend or a minor correction on the way to new highs (i.e. 6 months from now do you think the S&P500 will be higher or lower than today)?

- 64% - minor correction (S&P500 heading higher)
- 36% - start of a longer downtrend (S&P500 heading lower)

Week 171, 01/21/18 Report - The S&P500 closed for 2017 at 2,673.61. Where do you think it will close for 2018?

- 57.8%: Higher 2-20%.
- 15.6%: Lower 2-20%.
- 13.3%: Higher 21% or more.
- 6.7%: Unchanged. Less than 2% change Higher or Lower.
- 6.7%: Lower 21% or more.
