TimingResearch Crowd Forecast Prediction: 73% Chance Higher

This prediction is an attempt by the editor of this newsletter to use the full 5+ year history of data collected from this project to forecast a probability estimate for whether this week's sentiment is going to be correct and ultimately what the markets will do this coming week.

Details: Last week's majority sentiment from the survey was 56.3% Lower, and the Crowd Forecast Indicator prediction was 57% Chance Higher; the S&P500 closed 2.76% Lower for the week. This week's majority sentiment from the survey is 73.2% Lower with a greater average confidence from those who responded Lower. Similar conditions have occurred 11 times in the previous 296 weeks, with the majority sentiment (Lower) being correct 27% of the time and with an average S&P500 move of 0.53% Higher for the week. Based on that history, the TimingResearch Crowd Forecast Indicator is forecasting a 73% Chance that the S&P500 is going to move Higher this coming week.

NOTE: The following open-ended answers are solely the opinions of the anonymous respondents to this survey. Responses are mostly unedited, but some have been reformatted slightly for to make them easier to read. Some irrelevant responses (e.g. "none"), or anything obviously fake, or copy and pasted responses have been omitted. All-caps responses have been changed to all lowercase. All responses for each week, unedited, are available in the raw data spreadsheets at TimingResearch.com/data.

Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

“Higher” Respondent Answers:

- support line may be I think I guess maybe I guess
- Beginning of the month and new money should be hitting the stock market proportionately. We might even get some millennials involved.
- Surprise announcement of a trade deal with China
- Dead cat bounce
- because ts the right thing to do given that the chinese haven't started a war yet.
- waiting for w4down to finish
- technicals and Put/Call ratio
- Momentum is bearish but there is a probability of a minor spike keeping the indices around 200 sub or above.
- I think the trade between USA-China will reach a small agreement

“Lower” Respondent Answers:

- new tariffs on Mexico, continuing tariffs on China No new news on economy.
- trump
- crowd follow,
- Fridays epic selloff
- I sold my SDS last week near resistance, so of course the S&P will tank this week! LOL
- continue wave 2 down
- technical analysis
- momentum
- orderly correction to 200dma , pricing in rate cuts in dec/2019,bond market pricing it in. Crude big drop also adding to correction ,mexico,best to stand aside and wait for reversal .
- Mexico tariffs.
- The downside correction will continue. Major support lines are being broken.
- If the market acts like it did in Oct 2018, a rebound can come soon. But more likely IMO, with Mexico, China, yield curve inverting, and no infrastructure bill, this market moves downward more like in Jan 2016 and Dec 2018.
- Fib levels show retacement down to december lows, until market turn around
- chart analysis, support levels

[Monday, 1PM ET: Top Trading Experts Discuss This Report! Click Here To Learn More.](#)

- Impulsive POTUS. NO PLANS
- Your kidding? Fridays drop
- Slowing world economy
- Trend is down, trade wars
- Breaching support. Key weekly indicators show lower. Bonds increasing from institution cash.
- New terrific vs. Mexico.
- major support broken internals, momentum weak
- Market doesn't like uncertainty and there's SO much of it now.
- Mr Trump

Question #4. What methods or techniques do you use to overcome the emotional aspects of trading?

- That is my biggest issue
- Mood
- I use stops and market timing
- what emotion ?
- Use physical stops
- Keeping my eye on long range objectives, scaling out of positions as the opportunities presents them.
- i haven't figured a way to not be emotionally involved in my trades as of yet
- Fibanacia
- Sit it out.
- entry/exit rules
- technicals.
- Stop loss on profits no losses
- Donchian channels and different periodic cycles
- Set lost at the daily movement average and the moment trend
- patterns, price action, correlations, options behavior.
- perspective, patience
- Haven't found one yet. Any suggestions?
- Are you kidding? I'm very happy when a trade is profitable, and quite disappointed when a trade hits my stop. This is in spite of the risk/reward stuff which is supposed to keep me unemotional because I know that statistically, overall, my method should be profitable. I just accept that cannot keep emotions out of it.
- fixed stops
- fixed stops
- Still wrestle with them. 50/100/200 day MA.
- journaling
- algo trading
- Still trying after 20 years...Rely more on charts, money management, and separating trading from investments.
- Take some time, examine several charts before making a move.
- Try to follow a proven system but at end we succumb and fall to emotional flares.
- Talk with friends

Question #5. Additional Comments/Questions/Suggestions?

Thank you for all the feedback, feel free to [contact us](#) at any time with any other questions or comments.

- No technical data looks positive
- this is a great survey
- What is the best to find stocks that are trending up? With over 12000 stocks seems impossible.
- Market wants to go higher but it's being news driven down by Trump.
- Trading is no longer productive unless we have a real plan on certain time frames.
