Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

"Higher" Respondent Answers:

- Continuing Upward Trend for the (short-term) foreseeable future.
- strong close friday
- Momentum is rising, trend is up, money flow is rising. NYSE A-D hit a new high.
- Investors sentiment is bullish
- it shouldn't be this high & everyone knows it, so I'm just guessing it goes higher (blow-off top) before we end up correcting & valuations come back down to reality
- The market seems to be getting what it wants to go up, jobs, interest rates, but not great earnings.
- all time new highs, should consolidate and then move higher
- I think that we are in Elliot Wave 5 that has to play out before the next move down. I'm surprised that we haven't hit 2200 yet. With interest rates near zero, equities are a better bet!
- The market will likely move higher as investors keep the strong jobs reports in focus but other world economic factors could come into play and dampen the euphoria by weeks end.
- New all time highs means we are moving higher for now.
- up on Friday
- Money-flow from Europe
