TimingResearch Crowd Forecast Prediction: 62% Chance Higher
This prediction is an attempt by the editor of this newsletter to use the full 5+ year history of data collected from this project to forecast a probability estimate for whether this week's sentiment is going to be correct and ultimately what the markets will do this coming week.

Details: Last week's majority sentiment from the survey was 60.5% Lower, and the Crowd Forecast Indicator prediction was 62% Chance Higher; the S&P500 closed 2.08% Lower for the week. This week's majority sentiment from the survey is 51.5% Lower with a greater average confidence from those who responded Higher. Similar conditions have occurred 39 times in the previous 309 weeks, with the majority sentiment (Lower) being correct only 38% of the time and with an average S&P500 move of 0.02% Lower for the week. Based on that history, the TimingResearch Crowd Forecast Indicator is forecasting a 62% Chance that the S&P500 is going to move Higher this coming week.

NOTE: The following open-ended answers are solely the opinions of the anonymous respondents to this survey. Responses are mostly unedited, but some have been reformatted slightly for to make them easier to read. Some irrelevant responses (e.g. "none"), or anything obviously fake, or copy and pasted responses have been omitted. All-caps responses have been changed to all lowercase. All responses for each week, unedited, are available in the raw data spreadsheets at TimingResearch.com/data.

Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

"Higher" Respondent Answers:

- I answered higher because we are still in a bull move. The trend will continue til it is over. My confidence is, however, declining for I am thinking this bull is getting old and tired.
- gold, copper, transportation, XLF, FANGS, FXI, and more. 4 months and all hell will break loose
- Chart readings
- respite from trade war dialogue
- bounce
- higher lows
- Market still being pumped up
- A big sell may create a low but ultimately higher than last week
- Mkt is range bound with a move higher a probability. Trump must by now have realised his tariff tweets only damage the mkts.

"Lower" Respondent Answers:

- Seasonality and inversion yield curve.
- We're not done yet
- trade war
- downward flag pattern
- s/p-below the 50ma above 200ma-sideways -trend
- Trump's tweets about trade war
- The market is overbought again at the top of the trading range. There needs to be some back and filling.
- The market is near the top of its August box range. There's nothing I can think of to propel the market above that box at this time.
- The minute charts are very OB...
- Fear & Greed Index still showing extreme fear so investors less likely to take risks.

Question #4. What trading-related questions or topics would you like the experts to discuss on future episodes of the weekly Crowd Forecast News show and/or which experts would you like to see on the show who haven't been guests yet? (The show is off this coming week the market holiday, but back on September 9th.)

- What favourite tools do you use to help confirm a change in trend? How many price bars in the opposite direction do you look for til you decide the trend may be changing?
- Next market decline
- What is the best indicator for pickig tops and bottoms

Question #5. Additional Comments/Questions/Suggestions?

Thank you for all the feedback, feel free to contact us at any time with any other questions or comments.
