## NYSE: GMED

### Globus Medical, Inc.

Globus Medical, Inc. (NYSE: GMED) is a narrowly focused “medical device manufacturer with the singular goal of improving the quality of life for patients with musculoskeletal disorders.” One especially interesting device they offer is their ExcelsiusGPS system, a robotic arm for use in spinal surgery, which makes it a top innovator to watch in the robot and AI-assisted surgery field. Globus Medical was founded in 2003 and it’s IPO was in 2012.

industry summary

GMED’s market cap is currently around \$8 Billion, with an average daily share volume of about 450,000. The company currently pays no dividend. The stock is up about 66% over the last year (as compared to about 37% for S&P500) with growth being relatively steady.

Despite it’s innovative work and good performance, GMED seems to be relatively undervalued and by the market. If you’re looking for a relatively stable, innovative company with strong fundamentals and a good track record of market-beating performance, especially as interest in the field is likely to only increase over the next decade, this might be a good one to look into for your portfolio.
