## NYSE: FCX Freeport-McMoRan Inc.

Freeport-McMoRan is involved in mining operations for a variety of minerals, but the one that will be most import long-term is copper. Demand for copper is expected to increase drastically each year for the foreseeable future. According to FCX's 2020 Annual Report, electric vehicles use far more copper than cars with internal combustion engines, and renewable energy industries use more copper than fossil fuel power generation.

*If you're interested in learning more about the copper industry, be sure to also read our report on SCCO (Southern Copper Corporation) from August 8th, 2021, Issue #2 from this series, [download here](#).*

FCX's market cap is currently around \$55 Billion, with an average daily volume of over 19 million shares. The company currently pays a small dividend currently at under 1% yield. The stock is up about 105% over the last year (as compared to about 31% for S&P500) with growth being steadily higher from the low of the 2020 pandemic crash through May 2021, and stagnant/lower since.

FCX may be a stock to consider for taking advantage of long-term demand for copper.
