The following list of stocks was generated using the **Stock Watchlist Weekly algorithm** which analyzed thousands of stocks for both technical and fundamental positive indicators for high-probability, index-beating gain potential, for both short term trader and long-term investor watchlists (with a focus on no-dividend growth-focused mid-cap stocks).

The algorithm is limited to assessing substantial public companies: NYSE or NASDAQ listed; highly liquid; optionable; share price under $500.

This algorithm is used to generate picks each week through the Stock Watchlist Weekly Newsletter (click for 30-days FREE).
