5 Healthy Breakout Potential Stocks: Healthcare Stocks Set to Surge

by TimingResearch.com & StockWatchlistWeekly.com

Originally Published on Stock Watchlist Weekly on May 8th, 2025
Published on TimingResearch.com as Lightning Round #10

For this report, we ran an adjusted version of the Stock Watchlist Weekly Algorithm…

The Stock Watchlist Weekly algorithm is an objective process created to analyze thousands of stocks for both technical and fundamental positive indicators and deliver a list of the best stocks for high-probability, index-beating gain potential, for both short term trader and long-term investor watchlists.

Unlike the typical Sunday SWW reports, this report used the following adjustment to the typical algorithm: The low Dividend Yield requirement was dropped and the scope was changed to only Health Care sector stocks.

But otherwise, as usual, the stocks must be NYSE or NASDAQ listed; highly liquid; optionable; share price $3-$500.

This algorithm is used to generate picks each week through the Stock Watchlist Weekly Newsletter (click for 30-days FREE).

First, Why Health Care Stocks May Deserve a Spot in Your Portfolio:

We chose this theme for this report for some of the following reasons…

• **They're built for tough times** – People don't stop going to the doctor just because the market dips. Health care stocks tend to hold up when things get rocky.

• **Always in demand** – From checkups to surgeries to prescriptions, health care is a constant need—not a luxury. That's a strong base for steady business.

• **It's not just one thing** – You're not just betting on big pharma. The sector includes biotech, devices, insurers, hospitals—plenty of ways to win.

• **The world's getting older (and sicker)** – Aging populations and rising chronic conditions mean long-term demand is only going up.

• **Innovation is nonstop** – Biotech breakthroughs, high-tech treatments, and AI-powered health tools keep the sector exciting and full of upside.

• **Some pay you to wait** – Many health care stocks offer solid dividends, so you can get paid while the big trends play out.

• **FDA greenlights = stock rockets** – A new drug or device approval can send shares soaring. That's real opportunity if you're paying attention.

• **Safety + growth? Yes, please** – Health care is potentially one of the few places where you can find both steady footing and serious long-term growth potential.

💡 9) UTHR - United Therapeutics Corp

Basic Chart Analysis: UTHR is staging a recovery, nearing its 50-day EMA and gaining upward momentum with an RSI of 57.37. A breakout above $310–315 would confirm a potential reversal from its recent downtrend.

Basic Company Description: United Therapeutics Corp develops and commercializes therapies for rare and life-threatening diseases, with a focus on pulmonary arterial hypertension and organ transplantation.

ETF Major Holders: PBE, FTXH, FBT

Sector: Health Care

Industry: Biotechnology

Market Cap: $13.29B

Dividend Yield: none

Exchange: NASDAQ

Security Price: $294.60
