8 Beaten-Down Stocks Set to Soar

by TimingResearch.com & StockWatchlistWeekly.com

Originally Published on Stock Watchlist Weekly on June 21st, 2025
Published on TimingResearch.com as Lightning Round #11

For this report, we ran an adjusted version of the Stock Watchlist Weekly Algorithm…

The Stock Watchlist Weekly algorithm is an objective process created to analyze thousands of stocks for both technical and fundamental positive indicators and deliver a list of the the best stocks for high-probability, index-beating gain potential, for both short term trader and long-term investor watchlists.

Unlike the typical Sunday SWW reports, this report used the following adjustment to the typical algorithm: **The low Dividend Yield requirement was dropped and the scope was changed to only stocks that were below their 200-day SMA, 50-day SMA, and 20-day SMA levels.**

These are stocks that have been knocked down from recent highs but are now showing strong signals of factors that statistically lead to market-beating growth potential

But otherwise, as usual, the stocks must be NYSE or NASDAQ listed; highly liquid; optionable; share price $3-$500.

This algorithm is used to generate picks each week through the Stock Watchlist Weekly Newsletter (click for 30-days FREE).

💡 **Why These Stocks May Deserve a Spot in Your Portfolio:**

We chose this theme for this report for some of the following reasons…

• Oversold and Under the Radar — All stocks are trading below both their major SMAs, signaling potential bargain entries.

• Attractive Risk-Reward Profiles — These stocks may offer strong rebound potential with limited downside from already depressed levels.

• Mean Reversion Candidates — Many outperformers begin as underperformers. These stocks are poised for a potential snapback.

• Missed by the Crowd — While other traders chase headlines, you'll get a list of overlooked setups with smart technical foundations.
