Fibonacci Primer: 8 Ways Traders Use Fibonacci To Find Key Market Levels

Fibonacci analysis helps traders identify potential support, resistance, price targets, and risk zones. It does not predict the future, but it gives traders a structured way to prepare before price reaches important levels.

1. Retracements Identify Pullback Zones: Fibonacci retracements help traders measure how far a market may pull back after a strong move. Common levels include 38.2%, 50%, and 61.8%. Instead of chasing price after a rally, traders can wait for a pullback into one of these zones and then look for confirmation that buyers or sellers are stepping back in.

2. Extensions Project Price Targets: Fibonacci extensions help traders estimate where price may go after a breakout or continuation move. Levels such as 127.2%, 161.8%, and 261.8% are often used as potential profit-taking zones. They provide a disciplined alternative to guessing where a move might end.

3. Clusters Highlight Stronger Levels: A Fibonacci cluster forms when several retracement or extension levels from different price swings line up in the same area. These zones can become more important because multiple traders may be watching the same region for support, resistance, or reversal potential.

4. Pullbacks Can Improve Entries: Fibonacci levels can help traders become more patient. Rather than entering randomly, traders can wait for price to approach a key retracement zone, then confirm the setup with price action, volume, momentum, or another technical signal.

5. Levels Can Help Define Risk: Fibonacci can also help traders place stops more logically. For example, if a trader enters near a 50% retracement, the next major Fibonacci level may help define where the trade idea is invalidated. Stops should usually be placed beyond the obvious level, not directly on it.

6. Elliott Wave Traders Use Fibonacci Ratios: Elliott Wave traders often use Fibonacci to estimate where waves may end. Corrective waves may retrace part of a prior move, while impulsive waves may extend toward common Fibonacci targets. This helps traders map possible market structure.

7. Time Zones Add Timing Clues: Fibonacci time tools project future windows where a market may be more likely to change direction, accelerate, or pause. These timing tools are best used as alerts, not guarantees.

8. Confirmation Matters Most: Fibonacci works best when combined with other evidence, such as trend, momentum, volume, moving averages, prior highs or lows, and market sentiment. Used properly, Fibonacci helps traders prepare rather than predict.

Join us September 8th-10th to learn from up to 30 Fibonacci experts!

7 BEST TECH STOCKS FOR LATE 2026

ALGO-GENERATED WATCHLIST

TIMINGRESEARCH.COM

SEPTEMBER 2026

7 Best Tech Stocks for Late 2026

Algo Generated Watchlist

by TimingResearch.com & StockWatchlistWeekly.com

Published on September 1st, 2026
on TimingResearch.com as Lightning Round #18

This list was generated using most of the same parameters of the typical weekly Stock Watchlist Weekly algorithm lists with one major additional filter: It was limited to the special parameters described on the next page.

But otherwise, as usual, the stocks must be NYSE or NASDAQ listed; highly liquid; optionable; share price $3-$500.

This algorithm is used to generate picks each week through the Stock Watchlist Weekly Newsletter (click for 30-days FREE).

💡 Why These Stocks May Deserve a Spot in Your Portfolio:

• AI infrastructure spending remains a powerful growth engine for semiconductors, cloud platforms, data centers, and software providers. Goldman Sachs Asset Management described the 2025 tech outlook as “robust,” with AI moving into its next phase.

• The tech trade may broaden beyond the Magnificent Seven as smaller software, cloud, and AI-adjacent companies benefit from improving demand and easier financial conditions.

• Corporate IT spending is expected to keep growing, supported by demand for cloud, cybersecurity, AI tools, automation, and digital transformation.

• Software companies may become bigger AI beneficiaries as businesses move from building infrastructure to deploying practical AI applications.

• Cloud growth remains a major long-term driver, especially for companies tied to enterprise AI adoption, data management, and platform-based services.

• Cybersecurity demand should remain resilient because AI adoption, cloud migration, and geopolitical risk all increase the need for stronger digital protection.

• Potential Fed rate cuts could support tech valuations, especially for growth stocks whose multiples were pressured during the higher-rate cycle.

Of course there’s no guarantee that trend will hold but this strong seasonal trend provides a good opportunity for a new SWW special report…

For this report, we ran an adjusted version of the Stock Watchlist Weekly Algorithm to select only for Technology Sectors stocks that are statistically best positioned for market-beating upside over the next 1-3 months.

The Stock Watchlist Weekly algorithm is an objective process created to analyze thousands of stocks for both technical and fundamental positive indicators and deliver a list of the best stocks for high-probability, index-beating gain potential, for both short term trader and long-term investor watchlists.

💡 7) CTS - CTS Corp

Basic Company Description: CTS Corp designs and manufactures sensors, electronic components, and connectivity products for transportation, industrial, medical, and aerospace markets.

Basic Chart Analysis: CTS remains above its 200-day moving average but has weakened sharply from its summer highs, with price below a declining 50-day line. RSI is in the mid-30s, suggesting short-term momentum remains soft, though price is trying to stabilize near longer-term support.

Sector: Information Technology
Industry: Electronic Equipment, Instruments & Components
Market Cap: $1.62B
Volume (Avg): 279270
Dividend Yield: 0.28%
Exchange: NYSE
Security Price: $56.57

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 6) ESTC - Elastic N.V.

Basic Company Description: Elastic provides search, observability, security, and analytics software built around its Elasticsearch platform.

Basic Chart Analysis: ESTC has staged a strong recovery from its earlier downtrend, with price moving back above both the 50-day and 200-day moving averages. RSI is elevated in the low 70s, indicating strong momentum, though the sharp recent advance and volatility suggest the stock may need consolidation after the breakout.

Sector: Information Technology
Industry: Software
Market Cap: $10.50B
Volume (Avg): 2186680
Dividend Yield: none
Exchange: NYSE
Security Price: $99.91

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 5) SANM - Sanmina Corp

Basic Company Description: Sanmina provides integrated manufacturing, engineering, supply chain, and electronics production services for technology and industrial customers.

Basic Chart Analysis: SANM remains in a longer-term uptrend but has cooled after a major rally earlier in the year. Price is near the 200-day moving average and below the 50-day line, while RSI is slightly below neutral, suggesting the stock is consolidating and needs renewed momentum to confirm a stronger recovery.

Sector: Information Technology
Industry: Electronic Equipment, Instruments & Components
Market Cap: $10.40B
Volume (Avg): 1032930
Dividend Yield: none
Exchange: NASDAQ
Security Price: $194.01

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 4) FFIV - F5 Inc

Basic Company Description: F5 provides application delivery, security, cloud, and networking solutions that help organizations manage and protect digital applications.

Basic Chart Analysis: FFIV remains in a constructive uptrend, with price above its rising 200-day moving average and near the 50-day line after a period of consolidation. RSI has rebounded toward neutral, suggesting momentum is improving again, though the chart still needs a stronger breakout to confirm renewed upside strength.

Sector: Information Technology
Industry: Communications Equipment
Market Cap: $22.32B
Volume (Avg): 680150
Dividend Yield: none
Exchange: NASDAQ
Security Price: $394.24

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 3) ACIW - ACI Worldwide Inc

Basic Company Description: ACI Worldwide provides electronic payment software and solutions for banks, merchants, billers, and payment processors.

Basic Chart Analysis: ACIW has recovered from a long decline and is now consolidating after a strong summer breakout. Price is near the 50-day moving average and above the 200-day line, while RSI is near neutral, suggesting momentum has cooled but the broader technical picture remains constructive if support holds.

Sector: Information Technology
Industry: Software
Market Cap: $5.43B
Volume (Avg): 941340
Dividend Yield: none
Exchange: NASDAQ
Security Price: $53.83

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 2) CRSR - Corsair Gaming Inc

Basic Company Description: Corsair Gaming designs and sells gaming hardware, streaming equipment, peripherals, memory products, and related computer components.

Basic Chart Analysis: CRSR has shifted into a strong recovery trend, with price above rising 50-day and 200-day moving averages after a major breakout. The stock has pulled back from its spike highs but remains technically constructive, while RSI near the mid-50s suggests momentum is positive but no longer overheated.

Sector: Information Technology
Industry: Technology Hardware, Storage & Peripherals
Market Cap: $1.30B
Volume (Avg): 2388410
Dividend Yield: none
Exchange: NASDAQ
Security Price: $12.00

NOT financial advice. Info for Education/Research/Entertainment purposes only.

💡 1) SCSC - ScanSource Inc

Basic Company Description: ScanSource distributes technology products and provides value-added services for point-of-sale, barcode, networking, communications, and security solutions.

Basic Chart Analysis: SCSC remains in a strong uptrend, with price above rising 50-day and 200-day moving averages after a major spring advance. The stock has rebounded from a pullback and is trading near recent highs, while RSI is positive but not extreme, suggesting constructive momentum with some room for consolidation.

Sector: Information Technology
Industry: Electronic Equipment, Instruments & Components
Market Cap: $1.14B
Volume (Avg): 251850
Dividend Yield: none
Exchange: NASDAQ
Security Price: $56.55

NOT financial advice. Info for Education/Research/Entertainment purposes only.
